**Subject:** I am opposed to the new DOER NOI

Follow Up Flag: Follow up

Flag Status: Flagged Dear Howard Bernstein,

I am attaching a photo that shows (among others) yourself and myself – standing beneath an unarguably "NEW" machine helping our Commonwealth implement its RPS. I mean Hull Wind 1.

No doubt you realise – since you personally had a hand in moving the regs. forward, and helping Hull with the required paperwork to certify ourselves as eligible – that Hull Wind 2 is now "on order" with Vestas, and is likely to be up and generating REC-eligible green power by the end of calendar 2005.

Quite likely David L. O'Connor, the public-spirited man at DOER who gave the keynote address at our ribboncutting for Hull Wind 1 (29 June 2002) is just as aware of the stimulative effect – the very effective 'incentivising' – your good preparatory work at DOER has supported in the past. Please know that we in Hull will be disappointed with this present NOI, which signals a real watering-down of your good requirements. It also signals a weakening of our Commonwealth's RPS incentives for new renewables. The intent was toward NEW renewables.

Just as HW1 was new when you and David L. O'Connor were visiting in 2002, and as HW2 will be new when you stop by late 2005 – and just as the two of them have benefited immensely from Massenergy (and MTC and DOER) work – so we trust that Hull Wind 3, 4, 5 and 6 will continue to be helped.

None of these are "vintage" and none are designed to consume carbon-based fuels. Keep our Commonwealth clean, keep us in the leadership position you've helped put us in. Don't move forward in your NOI direction!

yours truly,

Malcolm Brown 126 Atlantic Av Hull MA 02045

## attachments:

- 1. photo of Howard B, Malcolm B next to David O'C's non-vintage renewable energy generator
- 2. scanned-in invoice (today's date) for 448 MWh of 'billable' REC's enough to pre-pay O&M on HW2 for 2006.
